

**Product Data Sheet**  
**Product: LT/LTQ/BC Spare Parts Kits and Tool Kits**

*Butterworth provides the parts and tools necessary to keep your tank cleaning operation running with minimal down time and cost.*

**In Application**

When your operation depends on the reliability of your tank cleaning operation, the ability to perform on-site maintenance is an absolute necessity. Whether you operate a brewery, commercial truck or rail car wash, ethanol plant or any facility where a failure of your tank cleaning system will shut you down, these kits are for you.

**Operational**

Butterworth provides Spare Parts Kits and Tool Kits specific to your Butterworth Tank Cleaning Machine model. Three Spare Parts Kits and Two Tool Kits are offered to allow you to customize the product to meet your needs. These kits, when utilized with our Operation and Instruction Manuals or available on-sit training, bring your tank cleaning operation to its optimum performance.

Spare Parts Kits are offered as standard, complete, or gear. The standard kit contains the normal wear items necessary for a seal change by most users. The complete kit contains all of the potential wear items in the machine and is recommended for heavy users. The gear kit contains all of the gears in the machine required for a complete overhaul.

Tool kits come either in a standard kit which includes all of the tools necessary to complete maintenance, or the lite kit which only includes the specialized tools needed for your Butterworth Machine.

**User Benefits**

- Properly matched parts for your specific serial numbers
- Discounted pricing over purchase of items individually
- Time savings by having all the necessary parts and tools in one place at the time of repair

**Standard Tool Kit**
